

# Celebrating

the legacy of NASI Scientists

February 13, 2025 | 2.00 pm to 5.35 pm

Faculty Hall, IISc Bangalore

*"A legacy is not leaving something for people, it's leaving something in people."* – Peter Strople

We gather to honour and celebrate the extraordinary careers and enduring contributions of the brilliant scientists of the National Academy of Sciences, India (NASI), who left us recently – Dr. Manju Sharma, Dr. R. Chidambaram, Prof. Rohini Godbole and Prof. Anil Kumar. Their dedication, vision, and passion have paved the way for groundbreaking discoveries and have left an indelible mark on the world of science.

Through their tireless efforts, they have enriched our understanding of the world and inspired generations of scientists to dream bigger, explore further, and strive for excellence.

This event is a tribute to their remarkable achievements, a celebration of their lasting impact, and an opportunity for us to share stories, experiences, and reflections that keep their memory alive. Let us come together to honor their legacy and recommit ourselves to the pursuit of knowledge and innovation, following in the footsteps of these luminaries.

Their light may no longer shine among us, but their brilliance continues to guide us forward.

# Celebrating

the legacy of NASI Scientists
